

United Structures of America

IS A PREMIER DESIGNER & MANUFACTURER OF METAL BUILDINGS.

Since 1980, our reputation has been built on a solid foundation of integrity, quality products, and strong relationships with our customers.

About USA

UNITED STRUCTURES OF AMERICA, INC.
WAS FOUNDED IN HOUSTON, TEXAS IN 1980.

We are a privately held company managed by a second generation of engineers and fabricators. Our size and staff is large enough to handle the most complex of projects, yet nimble enough to provide personalized service to each of our clients. Pride is taken with all of our projects, and we make a pointed effort to work with all trades to ensure that each project is completed successfully.

Facilities & Capabilities

UNITED STRUCTURES OF AMERICA, INC. HAS FABRICATION FACILITIES IN HOUSTON, TEXAS & PORTLAND, TENNESSEE.

Both facilities are of equal size and capability, and have the combined ability to fabricate 1600 tons per week. While our primary focus is Pre-Engineered Metal Buildings (PEMB), our capabilities go far beyond. Buildings are engineered and detailed individually in accordance with all applicable codes and contract requirements. We perform all engineering and drafting services in-house with experienced and licensed personnel.

In addition to the metal building market, we provide engineering and drafting services for structural steel fabrication. We integrate the sound principles of structural design with the speed and economics that built the metal building industry. The blend of the two systems allows for great structures to be built safely, on time and in budget.

Using the strength of steel and countless prismatic shapes, we are able to design and fabricate without limitations. Regardless of span, crane capacity or any other complex issue, we have the team it takes to perform. Come join the USA team and let us help you design and build your next project.

metal building systems
from the ground up.

Designing and fabricating without limitations.

It All Begins With the Right Design

United Structures of America is an engineering driven company with the strength for projects atypical within the industry. USA is an organization built on passion without exception using sound engineering, detailing and manufacturing principles as our foundation.

USA can design and detail all required steel in house using the latest and most efficient needs while coordinating with other design teams. Design and detailing service is performed in a 3-D environment, when required, allowing USA to coordinate BIM models with Contractors, Architects, MEP or any other trade.

WE PROVIDE PERSONALIZED SERVICE FOR OUR CLIENTS.

We Are USA Strong

At USA, we understand that personalized service is key in developing and delivering a superior product. Listening and responding to our customer's wants, needs, and concerns is the driving force behind USA. This is an indispensable component in developing, refining, and completing any project.

We can help you select the right materials and the right design to maximize your profit potential all while considering space, budget, or time constraints.

Industries We Serve

- CRANE BUILDINGS
- SPORTS FACILITIES
- HANGARS
- WORSHIP CENTERS
- SCHOOLS
- AGRICULTURAL BUILDINGS
- POWER GENERATION
- COMMERCIAL BUILDINGS
- STORAGE FACILITIES
- COMMUNITY BUILDINGS
- CONVENTIONAL STEEL STRUCTURES

WE BUILD GREAT STRUCTURES SAFELY, ON TIME & IN BUDGET WITHOUT LIMITATIONS.

The Right Design, The Right People

United Structures of America is a company with strength and knowledge to produce all types of projects. Precision and quality is the key to how well a structure fits in the field. This is USA's philosophy when selling, engineering, detailing, fabricating and constructing our buildings. Couple this with a team of self-motivated, driven and forward thinking employees that know how to get a project completed safely, on time and in budget.

SALES

Our sales team is the best in the industry. Our District Managers strive to understand all of our customer's needs then communicate this design to our inside staff for a smooth transition after the order is placed. Our inside team will follow the project from the time the order is placed until the project is complete.

required, USA will design the project in a 3-D modeling environment, working closely with our engineers from the very beginning of the project to assist other trades involved in the BIM modeling process.

ENGINEERING

Our engineers are engaged in a project from the very beginning. They are trained to think outside the box and to understand how constructability can improve efficiencies in all facets of the project.

FABRICATION

Capital improvements in equipment with new technology provides the right design for efficient production through our plants. We are without limitations when it comes to our fabrication capabilities. If a magnet can stick to it, we can fabricate it!

DETAILING

USA can detail all projects internally using the latest and most efficient tools on the market. We coordinate closely with architects, engineers, and other design team members. When

CONSTRUCTION

Understanding the constructability of a project is another design fundamental that makes a project successful. USA considers this aspect of the project from the bid process and throughout the design, detailing, fabricating & shipping process.
